Windmill equipment

A sea of opportunities

Modern vessels with increased capacity

Increased capacity (99 cbm) per container

Adapted vessel construction for specific cargo such as paper

Cargo in all sizes

Just to cross the Channel...

... or under more difficult circumstances

Delivering your cargo inland at your customer's premises, using sea-river coasters

Shortsea shipping is the transport mode which can ship your cargo throughout Europe, using European coastal waters, seas and oceans, including the Baltic, Mediterranean and Black Seas. An intermodal door-to-door concept ensures that your cargo reaches its ultimate destination. In certain countries your cargo can be delivered directly to your customer's premises inland, using sea-river coasters on inland waterways.

For all information, contact the Shortsea Promotion Centre Flanders: shortsea@shortsea.be or give us a call at +32 3 20 20 520. The promotion centre acts as a non-commercial intermediate, taking care of the promotion of the shortsea transport mode for the benefit of all market players. You will be introduced to partners who organise professional transport in an intermodal door-to-door concept.
